To the Trade

To obtain greater distributing facilities for the product of the Inland Type Foundry, and for the convenience of printers throughout the country, we have arranged with the American Type Founders Company and several dealers to carry in stock at their selling houses all of the beautiful type faces shown in this pamphlet. They will also carry in stock a few of the other popular Inland faces, and will fill orders for any Inland type or Inland material.

STARR, HALLEY & COMETTE

Jewelers and Watchmakers

415 Reade Building

We desire to call your attention to our newly established Silverware Department, where will be found displayed a complete assortment of the latest novelties and antique silverware, in addition to the creations of our own expert silversmiths who have placed our establishment in the foremost ranks of the jewelry world.

We earnestly invite your careful inspection of our line and comparison of the values we offer, and assure you it will afford us no small pleasure in embracing the opportunity to serve you. We trust your inclination and convenience will permit an early visit, and in the meantime we beg to continue

Most cordially yours,

STARR, HALLEY & COMETTE

LIGHT LITHO AND LITHO ROMAN

The Ansonia Institute of Dramatic Art

Suite 22-23
Manhattan Theater Building
Philadelphia

I beg to announce that on Thursday, September the fifth, the regular advanced course in Dramatic Art will begin. It is of great importance that the names of all students wishing to begin with the opening of the term be enrolled on or before September the first to insure a guarantee of admission. The management is to be congratulated upon the success of its efforts in inducing the popular tragedian, Mr. Jay Kaye Hamm, to forsake the professional stage to serve as the Institute's chief instructor.

ART EXHIBITION

A rare treat is in store for collectors of antiques and curios during our annual Fall exhibition, which opens Monday, October twenty-seventh, and continues the entire week. An exceptionally rare and valuable consignment has just been received, being the result of the entire year's work on the part of our expert foreign collectors, who are to be congratulated upon having so far exceeded their previous endeavors in this line, particularly with reference to curios.

The catalog is now on press, and aside from its descriptive and historical value, is an ingenious specimen of the printer's art. We hope every one of our friends will be fortunate enough to attend this exhibition.

Respectfully,

ERNEST J. KINTELL,

NOTICE TO INVESTORS

I desire to announce to the land investors thruout the East the Land Investors' Tour thru Central and Southern Texas, which will leave Grand Central Station by special schedule at 10:00 A. M., Wednesday, September 14th, and will arrive at San Hidalgo on the morning of the 16th.

Reservations applied for require four special trains, to consist entirely of sleepers, dining and observation cars, making the service most commodious and complete, and those who wish to participate in this combined business and pleasure trip are reminded that applications must reach me not later than the 10th, to enable me to provide for all.

The trip promises to be the most pleasurable one of the kind ever taken, while from a business point of view it will prove a highly profitable and most satisfactory one for all who invest in Texas land. Do not overlook the date, and in the meantime if any information is wanted, command me.

ALLEN S. SIMMS, Secretary

Dear Sir:

We wish to call your attention to the fact that our new line of ready-for-service clothes for the fall and winter seasons is now ready for the approval of our friends and customers. That our tailoring is superior to any other ready-for-service clothes is due to the fact that it has required over three-score years to bring our tailors and tailoring organization to its present up-to-date efficiency—a record of progressive development in fine-clothes tailoring enjoyed by no other ready-for-service clothes. Every garment sold by us is tailored in our own custom shops by our custom tailors, thus assuring perfection in all details. Because of the tuning up of our tailoring plant to a capacity one-third greater than our normal business—made necessary by our new wholesale business—our facilities for turning out high-grade garments is now greater than ever. As in former years our stock comprises many remarkable values, and we advise our friends to make their selections early, as we anticipate a very busy season

Yours very truly,

A New American Gun-Making Plant

THE UNITED STATES TO LEAD FOREIGN COUNTRIES
IN THE PRODUCTION OF FIREARMS

APPRECIATING that many American sportsmen purchase guns of foreign make and pay high prices for them because they have been unable to secure the desired class of workmanship in this country, a new gun-making plant has recently been formed with the most elaborate and complete equipment of the kind in the world for the manufacture of guns of the highest possible order. This news will be hailed with delight by every true American sportsman, and his name is legion. Having selected only the best in material and workmen skilled in the art of gun-making, the Winlin Arms Company, of Winsted, Mass., is now in position to offer the finest, most delicately, and at the same time substantially, constructed guns that inventive genius has thus far produced. Many improvements have been made in single and double-barrel shotguns and repeating shotguns and rifles, while the automatic arms will astound the sporting fraternity. The Winlin Perpetual Automatic Rifle is a wonderful piece of mechanism, and is certainly a most appropriately named arm, as its construction is such that with it one may fire practically an indefinite number of times, it being only necessary for the operator to keep the magazines supplied, while the safety pins render it completely under control at all times. This arm is designed exclusively for hunters of big game, and will be greatly appreciated by them.

A Brief Description of Some of the Finer Guns

The A-3 Automatic Ejector is the finest gun in the world for the money. Everything about this gun is exquisite and the workmanship is the best, every part being absolutely perfect.

Barrels—The very finest compressed steel. They are extremely hard and admit of the best work. With fair usage they are guaranteed not to burst.

Stock—The very choicest of Circassian walnut, especially selected from the roots of the oldest trees. The color is wonderfully rich and the figure beautiful.

Locks—Hand-made; the utmost care is exercised in making these locks. The work is very beautifully damaskeened and the locks as a whole are as elegant as a Swiss watch, and in every way as perfect.

Engraving—This gun is engraved with a setter dog in relief in the left lock plate and

a pointer in the right. Words cannot describe this work; it is the very finest engraving ever produced. Top of frame is elaborately ornamented and inlaid with gold in sides. All in all it is the handsomest gun ever offered.

The A-2 Automatic Ejector gun is designed for the hunter who wants a fine shooting gun, but not the finest possible finish. It has the choicest selection of stock and cannot fail to please the most artistic taste.

Barrels—Compressed steel, which gives perfect satisfaction. On this gun is used a very choice Damascus barrel, which has met with high favor. The figure is very fine and the execution most satisfactory.

Stock—The choicest of French, English or Circassian walnut, carefully selected as to color and grain, beautifully shaped, and as fine an appearing shotgun as anyone could wish for.
